-  RIM TEXT AREA
-  BUTTON FACE / LIME AREA

### TIPS FOR BEST RESULTS

- To add bleed around the edge of the button, extend artwork past second red dotted line.
- Keep rim text bold, sans serif and all caps for best readability.
- Turn off dashed guidelines layers before saving but don't delete any layers.
- Outline all fonts and embed all linked files before saving in one of the following file formats:  
vett 4x4 - vl 4x4 4x4 4x4 - vpl 4x4 4x4
